TitanDef / Gyun-i Cybersecurity

is a proud TANGO Partner

Services: Cybersecurity

TitanDef / Gyan-i Cybersecurity

TitanDef is a cyber governance, risk, and compliance platform for nonprofits, foundations, community banks, family offices, and small and midsize businesses. It shows an organization where it is exposed and what to do about it, in language a chief executive or board can act on. Every assessment produces an external attack surface scan, an inherent exposure review mapped to the CIS Controls and NIST CSF, peer benchmarking, and board-ready reporting with a prioritized action plan. Where deeper support is needed, our sister company Gyan-i Cybersecurity delivers the services layer: virtual CISO and advisory work, security program build-out, compliance readiness, vendor risk reviews, incident response planning, and 24x7 managed security operations.

Gyan-i Cybersecurity has served mission-driven organizations for more than 14 years, with a focus on private foundations, community nonprofits, and family offices. TitanDef Co. is its sister company and the software expression of that work. Founder and CEO Saurabh Gupta holds a CISSP and a master's in Information Technology from the University of Denver, has 25 years in cybersecurity, has taught at the Graduate School of Banking at Colorado, chairs cybersecurity programming for Philanthropy Colorado's Technology Round Table, serves on the Technology Association of Grantmakers Operations Committee, and sits on the board of Firefly Autism, where he chairs the Cyber Governance Subcommittee.
